Energetic Computer Engineering graduate with experience in software development, database management, and technical support. Passionate about leveraging technology to solve real-world problems and drive efficiency.

Summary of Qualifications

- Computer Engineering graduate with a strong foundation in software engineering and programming principles
- Experienced in **Java, Python, C, Angular** and **SQL** programming, **Microsoft Power Platform** and database management
- Competent verbal and written communication skills in a professional environment

Education

Bachelor of Engineering in Computer Engineering (BEng) (Software)

Sept. 2019 to April 2024

Toronto Metropolitan University (formerly Ryerson) -- Toronto, ON

Specialized Areas of Study

- Object Oriented Programming
- Database Systems
- Software Development
- Software Testing and QA

Relevant Work Experience

IT Analyst, Environment and Climate Change Canada -- Toronto, ON

May 2022 to August 2023

- Facilitating clients to solve their technology problems with the internal tech team
- Developed a workflow on Power Automate that orchestrates extraction of data from incoming emails and its storage in an excel file on SharePoint, using a filtering mechanism based on keywords in the subject line
- Developed a workflow on Power Automate that orchestrates extraction of ticket information from incoming emails and formats a notification message before pushing it onto a Microsoft Teams group chat
- Developed a scheduler app on Power Apps that allows end users to add and modify data via an intelligent form that populates fields based on previous answers and has features such as drop-down menus that are linked to internal databases
- Monitoring application uptime through ELK, using the dashboard for data extraction and visualization

Help Desk Technician, Pearl Sign Inc -- Toronto, ON

October 2019 to April 2022

- Provide networking and desktop support, account maintenance and printing assistance to staff
- Served as the primary resource for troubleshooting and resolving complex IT issues
- Assisted in installing multiple new computers for the lab

Self Learning Engineering Projects and Other Initiatives

2017 to Present

- Programmed multiple games using Java
- Developed multiple web applications using Angular
- Contributed to developing a car security system for a capstone project
- Assembling a gaming pc
- Player for the TMU Rocket League team
- Executive member of the TMU Gamers Guild

Strengths

Technical Skills

- Languages/Frameworks
 - Java, Python, C, SQL, MATLAB, Angular
- Database management
 - MySQL, MongoDB
- Cloud-based technologies
 - Power Automate, Power Apps
- IDE
 - Eclipse, VS Code, PyCharm, NetBeans

Soft Skills

- Strong interpersonal skills
- Advanced communication skills
- Problem solving skills
- Teamwork and leadership
- Eager to learn
- Self and time-management
